WORK EXPERIENCE

- **Development Android and iOS**

From: October, 2014 To: Present day

Currently I am developing my own Android and iOS applications for the official markets.

- **Sistemas Informáticos**

Place: Puerto de Sagunto, Valencia From: June, 2013 To: October, 2014

Android programming. Development of multimedia applications for Android Smartphones. My main duties include developing and maintaining phone apps for customers, as well as simple web services to support these apps.

- **Informàtica Puçol**

Place: Puçol, Valencia From: September, 2011 To: May, 2013

Informàtica Puçol is shop specialised in supplying computer components and other electronics goods, and maintenance and/or reparation service for computers, laptops, printers ... etc. We also provided technical assistance to close-by companies and enterprises.

- **APP**

Place: Pobra de Farnals, Valencia (SPAIN)

From: November 1st, 2009 To: May 15th, 2010

APP is an electronics specialist supplier of computer components, software and hardware, TV's, digital cameras and other electronic goods. We also offered a repair service for computers and laptops. My main duties included computer diagnostics and repair of hardware or software.

- **Donate, s.l.**

Place: Alaquàs, Valencia (SPAIN) From: November 15th, 2008 To: April 15th, 2009

Donate are a SME manufacture and supply interiors doors, fixtures and cabinets. I was employed to design and maintain their website, including setting up a web server. The website was built using HTML, PHP and MySQL. This IT Project also included creating a database to catalogue the products that linked into the website to provide real time product information and cost calculation.

- **Politechnic University of Valencia**

Place: Valencia From: July 1st, 2008 To: September 30th, 2008

During this role I supervised the Learning Resource Centre at Polytechnic University of Valencia. I was responsible for supervising the students while on the desktops and laptops. This included assisting them with their issues and the administration of the network to ensure they abide by the IT User Policy.
